A member granted Full Retirement status may reactivate their registration with full rights of membership by:

- Receiving approval of the CRBOH Board of Directors

Alternatively, a member granted Full Retirement status may reactivate their registration by:

- successfully challenging the appropriate registration examination. Reactivation from retired to active

status will be granted only once for any member.

The registrar is responsible for establishing rules and procedures regarding reactivation and other status modifications that respect the intent of the formal registration procedure and the policy on retirement status.

A member or ex-member may be eligible to be re-activated or move to a different status upon a formal request to the registrar stating the reason for the requested change.

The registrar will forward a recommendation to the Board of Directors stating potential conditions in line with the registration process that must be met by the applicant (fees, maintenance points, challenge to appropriate exams...) for Board approval.
